Practical

- 1. Implement the error correcting code.
- 2. Implement the error detecting code.
- 3. Implement caeser cipher substitution operation.
- 4. Implement monoalphabetic and polyalphabetic cipher substitution operation.
- 5. Implement playfair cipher substitution operation.
- 6. Implement hill cipher substitution operation.
- 7. Implement rail fence cipher transposition operation.
- 8. Implement row transposition cipher transposition operation.
- 9. Implement product cipher transposition operation.
- 10. Illustrate the Ciphertext only and Known Plaintext attacks.
- 11. Implement a stream cipher technique.
